Advanced Metal Hose

Metal Hoses are at the heart of industrial processes.
Here's how we make sure you get only the best...

Our welders are AWS certified to ASME's Boiler & Pressure Vessel Code, Section IX - B31.1 and B31.3

One custom hose -
or a large production run -
our hoses are competitively priced
with timely deliveries.

We extend the life

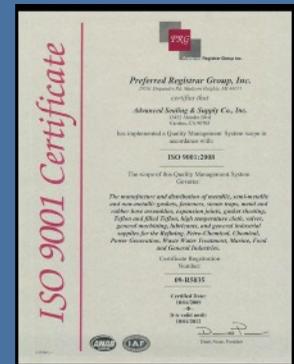

of your metal hose with silicone, metal or other type of guard or jacket - protecting the assembly from over bending, abrasion or thermal damage.

Our crimped metal hose assemblies have hydro tested beyond the manufacturers published burst pressures.

We incorporate steam tracers or jackets into hoses to keep the media at the optimal temperature.

DVBE Certified
