## rapid RAILCAR CONNECTOR

Advanced Sealing is pleased to introduce our under-car, in-plant steam connectors for the asphalt and emulsion markets. After extensive field testing in asphalt refining, we are confident that these are the safest and most convenient connectors for your steam/condensate under-rail-car and in-plant requirements.

60° connector (P/N JSURC-64-60)

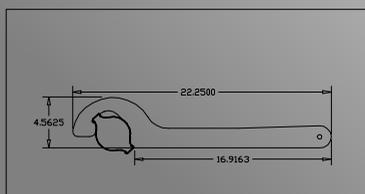

Aluminum Spanner Wrench (Optional)

90° connector (P/N JSURC-64-90)

### Our connectors offer the following features and benefits:

1. Lightweight - Easy to connect
2. Seamless Construction - Eliminates leak paths
3. 60° and 90° angle - Relieves stress on hose and extends hose life
4. Spin on Attachment - Just "set and spin," reduces time underneath rail car
5. Female Swivel NPT - Affords optimum position to avoid under car obstructions
6. Special Gasket Seal - Made specifically to resist steam attack and remain pliable
7. Male Steam Hose Adaptor - Can be easily replaced if threads become damaged
8. Lightweight Aluminum Spanner Wrench (option) - Spark free and easy to use for "snugging"  
- Long handle reduces stress on worker

We also offer steam hose (rubber or metal), product delivery hoses with internal steam tracing, steam traps, pump traps, strainers and valves for the asphalt/emulsion industry.
