TURNAROUND HOSE vs. TEMPORARY PIPE

Change temporary piping runs with reusable hose assemblies and:

- A. Reduce procuring threaded pipe and fittings for temporary lines.
- B. Reduce number of pipe machines and labor hours for install and repair of temporary lines.
- C. Reduce labor hours for installing and dismantling of screwed pipe.
- D. Reduce welding time for seal welding temporary screwed pipe ends.
- E. Reduce the amount of pipe and fittings ending up in reclamation.

From This...

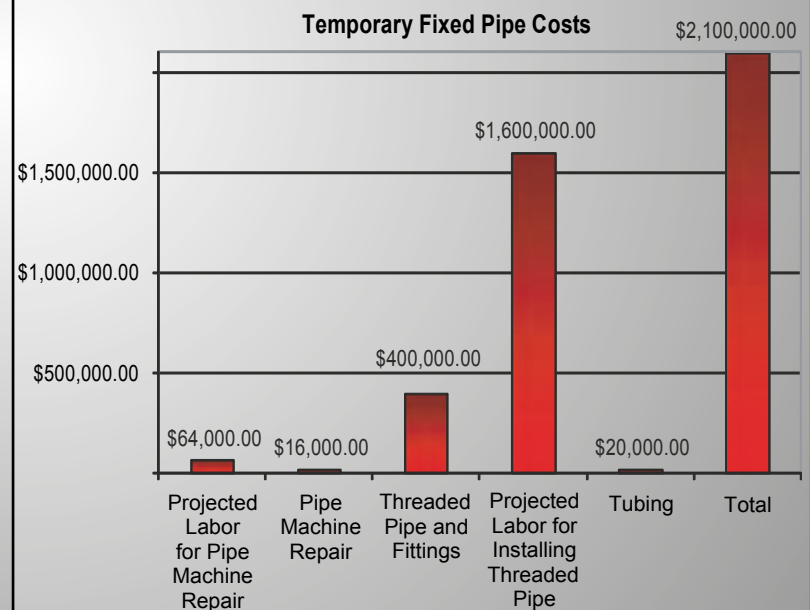

...To This

Only four hose styles are required:

1. Goodyear Pyroflex Hydrocarbon Drain Hose w/Crimped MNPT
2. Goodyear Flexsteel 250 Steam Hose w/Crimped Ground Joint Couplings
3. Goodyear Fabchem Hose w/Crimped Ends
4. Advanced Sealing's Section IX Metal Hose Assemblies

Research finds that for every \$1.00 spent on temporary piping, a refinery averages \$3.46 to \$7.50 in additional labor costs.

Hoses are reusable, repairable, store easily, reduce cost and provide an efficient and safe turnaround event.

Save Hundreds of Thousands of \$\$\$ on each TAR!
